Application process ends : 14th November 2020
Beginning of the course : 17th November 2020
Duration of the course : 28 days

About the course

Co-creation of innovation and knowledge in agriculture, forestry and related bio-value chains is crucial to overcome obstacles preventing efficient implementation of ideas of sustainability in the agrifood sectors. To support this, 'NEXTFOOD - Educating the next generation of professionals in the agrifood system' is conceived as a research programme to generate an innovative science and education road map for sustainable agriculture along the value chain from research via fabrication into application. The Certificate Course on Agroecology- Action Research and Education' is a case under the NEXTFOOD project which envisages to inculcate capabilities in action-based learning in Agroecology by fostering knowledge and skills for analyzing and developing sustainable agroecological models. The aim of the course is to equip the students with core competencies to address the transdisciplinary challenges of sustainable development based on action reflection methodology. Certification will be based on continuous and comprehensive evaluation.
